PROFESSIONAL SUMMARY

AI/ML Engineer and Data Analyst with **1 year of professional experience** working with machine learning, data analysis, visualization, and AI-based applications. Experienced in using **Python, SQL, Power BI, Tableau, and machine learning frameworks** to turn raw data into useful insights and practical solutions. Comfortable working across the complete data workflow, including data cleaning, exploratory analysis, feature engineering, model development, evaluation, dashboard creation, and API integration. Strong problem-solving mindset with an interest in building reliable, business-focused data and AI solutions.

PROFESSIONAL EXPERIENCE

AI/ML Engineer

Solitaire Infotech | Mohali, Punjab

June 2025 – June 2026

- Worked on machine learning and data-driven projects involving **data preparation, model development, testing, and performance evaluation** using Python.
 - Cleaned, transformed, and analyzed structured datasets using **Pandas and NumPy**, preparing data for machine learning and analytical applications.
 - Built and compared machine learning models using **Scikit-learn, XGBoost, TensorFlow, and other ML libraries** based on project requirements.
 - Applied feature engineering, cross-validation, and hyperparameter tuning to improve model performance and select suitable algorithms.
 - Used **SQL** to extract, filter, join, and analyze data, while improving query efficiency through better query structure and database practices.
 - Developed **Power BI and Tableau dashboards** to track KPIs, identify trends, and present business insights in an easy-to-understand format.
 - Created DAX measures, calculated fields, filters, slicers, and data relationships to build interactive and user-friendly dashboards.
 - Developed **Flask and FastAPI REST APIs** for integrating machine learning models with web applications and other software systems.
 - Worked with development and deployment tools including **Git/GitHub, Jupyter Notebook, Docker, and cloud platforms** as required by projects.
 - Collaborated with team members to understand requirements, troubleshoot issues, test solutions, and communicate technical findings clearly.
 - Documented analysis, model results, and project workflows to make solutions easier to understand and maintain.
-

PROJECTS

Machine Learning Classification System

Python | Scikit-learn | XGBoost | Pandas | NumPy

- Built a machine learning classification system to compare different algorithms and identify the most suitable model for the prediction task.
- Worked with a dataset containing **50K+ records**, performing data cleaning, preprocessing, feature engineering, and model preparation.
- Compared **KNN, Naive Bayes, SVM, Random Forest, XGBoost, Gradient Boosting, and Neural Network** approaches.
- Achieved **94.2% accuracy** on the test dataset with the selected model.
- Evaluated model performance using **Accuracy, Precision, Recall, F1-score, ROC-AUC, and Confusion Matrix**.
- Used hyperparameter tuning and feature engineering to improve model performance and reduce overfitting.

Business Performance Dashboard

Power BI | SQL | DAX | Power Query

- Developed an interactive Power BI dashboard to provide a clear view of **business performance and key performance indicators**.
- Prepared and transformed data using **SQL and Power Query** before building the reporting model.
- Created DAX measures and calculated fields to support KPI tracking and dynamic analysis.
- Added interactive slicers, filters, and drill-through functionality to help users explore the data without writing SQL queries.
- Optimized the data model and dashboard calculations, reducing the reported refresh time from approximately **45 seconds to 8 seconds**.
- Presented key trends and performance indicators through simple, decision-focused visualizations.

Sales Analytics Dashboard

Tableau | SQL | Excel | Data Visualization

- Created a Tableau dashboard to analyze **sales performance, regional trends, customer segments, and product categories**.
- Analyzed data across **5 regions and 25+ product categories** to identify performance patterns and areas of improvement.
- Built calculated fields, filters, KPIs, and geographic visualizations to make sales information easier to understand.
- Used historical sales data to perform basic **revenue forecasting** and support business planning.
- Focused on presenting insights in a simple format that could be easily understood by both technical and non-technical users.

TECHNICAL SKILLS

Programming: Python, SQL, JavaScript

Data Analytics: Data Cleaning, Exploratory Data Analysis, Data Transformation, Feature Engineering, Statistical Analysis, Predictive Analytics

Machine Learning: Classification, Regression, Clustering, Ensemble Methods, Model Evaluation, Cross-Validation, Hyperparameter Tuning

ML Libraries & Frameworks: Scikit-learn, XGBoost, TensorFlow, Keras, PyTorch, Pandas, NumPy

Business Intelligence & Visualization: Power BI, DAX, Power Query, Tableau, Advanced Excel, Matplotlib, Seaborn, Plotly

Web & APIs: Flask, FastAPI, REST APIs

Databases: MySQL, PostgreSQL, MongoDB, SQLite

Cloud & Deployment: AWS, Azure, Google Cloud, Docker, Basic CI/CD

Tools: Git, GitHub, Jupyter Notebook, JupyterLab, VS Code, PyCharm, Anaconda, Conda, Pip

EDUCATION

Bachelor of Technology (B.Tech) – Artificial Intelligence & Data Science

Chandigarh Group of Colleges, Landran, Mohali, Punjab

2022 – 2026 | CGPA: 7.60/10

CERTIFICATIONS

- **Python Programming Certification** – Solitaire Infosys
- **Advanced MS Excel Certification** – EDUCBA
- **Java Programming Certification** – EDUCBA
- **Android Development Certification** – ThinkNEXT Technologies

ADDITIONAL INFORMATION

Languages: English, Hindi

Availability: Immediate

Professional Strengths: Analytical Thinking • Problem Solving • Data-Driven Decision Making • Communication • Team Collaboration • Attention to Detail
